AMBITION POUR LE FUTUR

7

#### Affordable housing

- ✓ According the residents' poll, with a score of 33%, the main solution is to tax empty dwellings.
- ✓ The development of social housing comes second. We do not observe significant differences between the different socio-demographic profiles.
- ✓ The young people favour the implementation of big hosing projects
- Cross-border workers do support the same opinion as the residents, but would advocate as second solution for the implementation of bigger housing projects in order to lower the prices.
